

Terms and conditions

These terms and conditions apply to the Don't Hit Firulokita application (hereinafter referred to as "Application") for mobile devices that was created by Firulokita Games (hereinafter referred to as "Service Provider") as an advertising service.

By downloading or using the Application, you automatically agree to the following terms. It is strongly recommended that you read and understand them carefully before using the Application.

Unauthorized copying and modification of the Application, or any part thereof, is strictly prohibited. No attempt is permitted to extract the Application's source code, translate it into other languages, or create derivative versions. All trademarks, copyrights, and other intellectual property rights related to the Application are owned by the Service Provider.

The Service Provider strives to provide a good experience, but provides the Application 'as is' and 'as available'. There is no guarantee that the Application will be error-free, always effective, or function uninterrupted on all devices. The Service Provider reserves the right to modify or discontinue the Application at any time.

Data and Progress Loss: Game progress, scores, and any unlocked virtual objects are stored solely on your device's local memory. The Service Provider does not back up to the cloud or store this data on external servers. Therefore, the Service Provider is not responsible for the permanent loss of such progress if the user uninstalls the application, clears the cache, changes devices, or experiences a technical failure in their operating system, including data loss resulting from application updates, installation failures, or incompatibilities with new operating system versions.

Please note that the Service Provider is not responsible for certain aspects. Some features of the Application require an active internet connection, which may be Wi-Fi or provided by your mobile carrier. The Service Provider is not responsible if the Application does not function at full capacity due to a lack of Wi-Fi or if you have exceeded your data allowance.

If you use the app outside of a Wi-Fi zone, please note that your mobile carrier's contract terms apply. Therefore, you may incur charges from your mobile carrier for data usage while

connected to the app, or third-party charges. By using the app, you accept responsibility for these charges, including data roaming charges if you use it outside your territory (i.e., region or country) without disabling data roaming. If you are not responsible for paying the bill for the device on which you use the app, it is assumed that you have obtained permission from the responsible party.

Similarly, the Service Provider cannot always be held responsible for your use of the application. For example, it is your responsibility to ensure that your device remains charged. If your device runs out of battery and you cannot access the Service, the Service Provider is not liable.

Regarding the Service Provider's responsibility for your use of the application, it is important to note that, while they strive to ensure it is up-to-date and accurate at all times, they rely on third parties to provide them with information and make it available to you. The Service Provider is not liable for any loss, direct or indirect, that you may suffer as a result of relying entirely on this functionality of the application.

The Service Provider may wish to update the application at any time. The application is currently available, but operating system requirements (and those of any additional systems to which the Service Provider may decide to extend its availability) may change, and you will need to download updates if you wish to continue using it. The Service Provider does not guarantee that it will always update the application to be relevant to you or compatible with the operating system version installed on your device. However, you always accept application updates when they are offered to you. The Service Provider may also wish to stop providing the application and terminate your use of it at any time without prior notice. Unless you are notified otherwise, in the event of termination, (a) the rights and licenses granted to you under these terms will end; (b) you must stop using the application and (if necessary) remove it from your device.

Virtual Currency and Rewards: Any currency, points, items, or prizes earned through gameplay or the ad spinner are purely virtual. They have no real monetary value, are non-refundable, and cannot be exchanged for real money or goods outside the app.

Content and AI: Parts of the visual art in this Application have been generated or assisted by Artificial Intelligence tools. The user accepts the use of such content "as is" and acknowledges that the game mechanics are common in the industry.

Changes to these Terms and Conditions

The Service Provider may periodically update its Terms and Conditions. Therefore, we recommend that you check this page regularly to stay informed of any changes. The Service Provider will notify you of any changes by posting the new Terms and Conditions on this page.

These terms and conditions come into effect on December 29, 2025.

Contact us

If you have any questions or suggestions regarding the Terms and Conditions, please feel free to contact the Service Provider at firulokita@gmail.com.

This Terms and Conditions page was generated by [the App's Privacy Policy Generator](#)

Privacy Policy

This privacy policy applies to the Don't Hit Firulokita mobile application (hereinafter, the "Application"), created by Firulokita Games (hereinafter, the "Service Provider") as an ad-supported service. This service is intended for use "as is".

What information does the Application collect and how does it use it?

The app does not collect any personal information upon download. Registration is not required to use it. The "Share" feature allows you to capture a screenshot of the game screen (such as scores or progress) locally on your device. This screenshot is stored temporarily and is only shared with other apps if the user chooses to do so manually via the system menu. The Service Provider does not have access to these screenshots or store them on external servers.

Does the app collect accurate information about the device's location in real time?

This application does not collect precise information about the location of your mobile device.

Do third parties see and/or have access to the information obtained by the Application?

With the exception of the Google AdMob advertising services detailed below, the Application does not collect personally identifiable information or share data with third parties. The

content sharing process is managed locally by the operating system and does not involve data collection on our part.

Rights to Opt Out and Delete Data

Since the App does not collect personal data on external servers, users can exercise their right to opt out simply by uninstalling the App. Uninstalling it will permanently delete all locally stored data (such as scores and progress) from their device. Regarding ads, users can manage their privacy preferences and reset their advertising ID in their Android or iOS device settings.

Children

The Application is not used to deliberately solicit data from children under the age of 13 or to market such data to them.

The Service Provider does not intentionally collect personally identifiable information from minors. The Service Provider recommends that all minors never submit personally identifiable information through the Application or Services. The Service Provider recommends that parents and legal guardians supervise their children's internet use and assist in enforcing this Policy by instructing them never to provide personally identifiable information through the Application or Services without their permission. If you have reason to believe that a minor has provided personally identifiable information to the Service Provider through the Application or Services, please contact the Service Provider (firulokita@gmail.com) so that they can take appropriate action. You must also be at least 16 years old to consent to the processing of your personally identifiable information in your country (in some countries, we may allow your parents or guardians to do so on your behalf).

Security

The Service Provider is committed to safeguarding the confidentiality of your information. However, since the Application does not collect information, there is no risk of unauthorized access to your data.

Third-Party Services and Advertising:

This Application uses the Google AdMob service for maintenance. We have configured this service to display only non-personalized ads. However, the AdMob SDK may process technical identifiers (such as advertising ID and IP address) solely for frequency capping, aggregate

reporting, system diagnostics, and fraud prevention purposes, in compliance with applicable privacy laws. This data is managed directly by Google under its own privacy policy.

Changes

This Privacy Policy may be updated from time to time for any reason. The service provider will notify you of any changes to its Privacy Policy by updating this page with the new Privacy Policy. You are advised to check this Privacy Policy periodically for any changes, as continued use of the service constitutes acceptance of all changes.

This privacy policy is effective as of December 29, 2025.

Your consent

By using the Application, you consent to the processing of your information as set forth in this Privacy Policy now and as amended by the Service Provider.

Contact us

If you have any questions about privacy while using the Application, or questions about the practices, please contact the Service Provider by email at firulokita@gmail.com
